

### Application Drawing

#### Rock Sock/BlackHawk Inlet Filter Mat - Inlet Protection

1. Sweep area around the inlet to remove any debris being careful not to sweep into the inlet opening.
2. Place BlackHawk Inlet Filter Mat over the metal grate aligning the outer edge of the magnets with outer edge of the grate/cradle.
3. Place Rock Sock around the perimeter of the BlackHawk Filter Mat but not on top, overlap the ends of the Rock Sock.
4. Service the BMP 24 hours after every rain event or once every 7 days.
